

TO: Chairman and Members

DATE: September 8, 2011

**SUBJECT: Sacramento County Youth Detention Facility
Update on Crowding**

AGENDA ITEM: B

ACTION:

INFORMATION: X

RESOURCE PERSON: Field Representative, Toni Gardner

Summary:

This action item is a report on the status of crowding at Sacramento County Youth Detention Facility (YDF). The Corrections Standards Authority (CSA) is mandated under Section 209(e), Welfare and Institutions Code (WIC) to determine the “suitability” of California juvenile halls when there are areas of noncompliance related to crowded conditions. CSA staff has closely monitored the crowding and totality of conditions at Sacramento County YDF since January 2000.

Background:

On March 8, 2007, the CSA Board considered the matter of the suitability of Sacramento County Youth Detention Facility based on crowding and the totality of conditions documented during a site visit on December 22, 2006. The Board requested that Sacramento County update their previous suitability plan (SP) to include a description of all measures the county would take to maintain the juvenile hall population below the SP population limits. A determination of suitability was continued to the May 10, 2007 CSA meeting at which time the Board found that YDF was a suitable place for the confinement of minors. The Board required the county to conform to the suitability plan, submit monthly population data for each living unit, and present progress reports at each CSA Board meeting. On September 13, 2007, the reporting requirement was reduced to every six months. The county has reported at that interval since and their last appearance before this Board was March 10, 2011.

An overview of the entire facility population is provided in Attachment A. Attachment B depicts the number of units meeting their rated capacity and suitability plan limits. Data is provided to CSA through monthly population reports. In addition, CSA staff conduct visits to the facility to assess compliance with the suitability plan and totality of conditions at the facility. The results of the most recent visit were summarized in the August 9, 2011 letter to Chief Don L. Meyer (Attachment C).

Since May of 2008, each YDF unit has been at or below rated capacity. YDF has not experienced crowded conditions in spite of the closure of the Warren E. Thornton Youth Center (June 2009) and the Sacramento Boys Ranch (June 2010), and the termination of the contract to house minors in Yolo County (June 2010).

Recommendation/Action Needed: Information Only
